

## Green & Ethical Insurance

**Insurance companies provide cover to a wide variety of customers, from consumers to large corporations. But do they have guidelines or policies as to who they will and won't insure?**

### **The green and ethical options**

For home, motor, travel, life and health insurance, there is a small but growing number of green and ethical insurance products available, these include:

- [Co-operative Insurance](#): Insurance types: home, motor, life, health

This provider has a comprehensive ethical engagement policy in place that governs all its insurance decisions. The Co-op's 'ecoinsurance' scheme offers cash incentives as well as environmental pledges. It offsets the equivalent of 20 per cent of the CO2 from every vehicle insured and also offers premium discounts for greener cars.

- [Climate Sure](#): Insurance type: travel

Climate Sure calculates the CO2 produced by flying overseas and pays for it to be 'offset' by funding sustainable energy projects.

- [Green Insurance Company](#): Insurance type: motor

This provider aims to offset your car's carbon emissions and offers discounts on greener cars/lower mileage.

- [Nature Save](#): Insurance types: home, travel, personal accident and illness

This company puts 10% of its personal insurance premiums in a fund (Naturesave Trust) to benefit environmental and conservation projects. It also offers a free environmental performance review for commercial clients and aims to use suppliers that support sustainable business practices.

- [Ansvar Insurance Co Ltd](#): Insurance types: home, motor, travel

Insurance is sold to individuals and organisations with close connections to or a specific not-for-profit remit.

## **Your next steps**

Use [YourEthicalMoney.org](https://www.yourethicalmoney.org) to find insurance companies who perform best against our green and ethical criteria. You can also check out our guide [Next Steps – Insurance](#) for suggestions on how to give your insurance policies a green and ethical makeover as well as the questions you should be asking your current or prospective insurance provider.

**Get peace-of-mind knowing you're insured by an ethical provider**
